

UJIAN TENGAH SEMESTER GASAL

Projek Membuat Website Statis

DIBUAT OLEH:

Nama : Kiki Triwidiyanti

NIM : 162012133003

Tanggal Praktikum : 29 Oktober 2021

LAPORAN PRAKTIKUM:

Langkah-langkah pembuatan website statis :

1. Langkah pertama, yakni mencari template yang akan digunakan untuk mengerjakan website yang nantinya akan diubah dan disesuaikan dengan kebutuhan untuk memenuhi penugasan project Ulangan Tengah Semester Gasal mata kuliah Algoritma Pemrograman II. Template yang saya gunakan didapatkan dari link berikut :
<https://www.free-css.com/free-css-templates/page263/moschino>
2. Langkah kedua, setelah mendapatkan template yang sesuai dengan selera dan kebutuhan maka template tersebut perlu didownload dan diekstraksi.
3. Langkah terakhir yakni memahami html, css, dan js dari template kemudian melakukan editing template untuk disesuaikan dengan penugasan project.

Website dapat diakses pada link berikut :

- <https://github.com/KikiTriwidiyanti/KikiTriwidiyanti.github.io>
- KikiTriwidiyanti.github.io

Dokumentasi dan penjelasan pembuatan githubpage dengan menggunakan sistem git.

1. Langkah pertama

Melakukan login lalu buka www.github.com/new yang mana disini kita akan membuat repositori baru, dengan nama username.github.io, lalu klik creat repository.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner * KikiTriwidiyanti / Repository name * KikiTriwidiyanti.github.io ✓

Great repository names are short. KikiTriwidiyanti.github.io is available. How about [reimagined-waffle?](#)

Description (optional)

☒ **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☐ **Add a README file**
This is where you can write a long description for your project. [Learn more.](#)

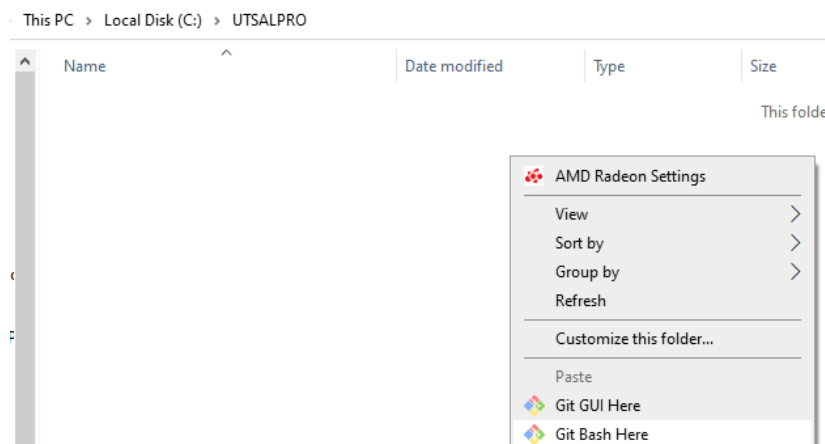

☐ **Add .gitignore**
Choose which files not to track from a list of templates. [Learn more.](#)

☐ **Choose a license**
A license tells others what they can and can't do with your code. [Learn more.](#)

Create repository

2. Langkah 2

Membuat folder kosong, disini saya membuat folder kosong pada local C dengan nama folder “UTSALPRO”, setelah itu klik kanan pada folder kosong tersebut dan pilih git bash here.

3. Langkah 3

Setelah mengeklik git bash here pada repository kosong tersebut maka pada langkah ketiga yakni kita masukkan perintah git clone yang berfungsi untuk melakukan cloning dari repository github ke local dan juga melakukan inisialisasi.

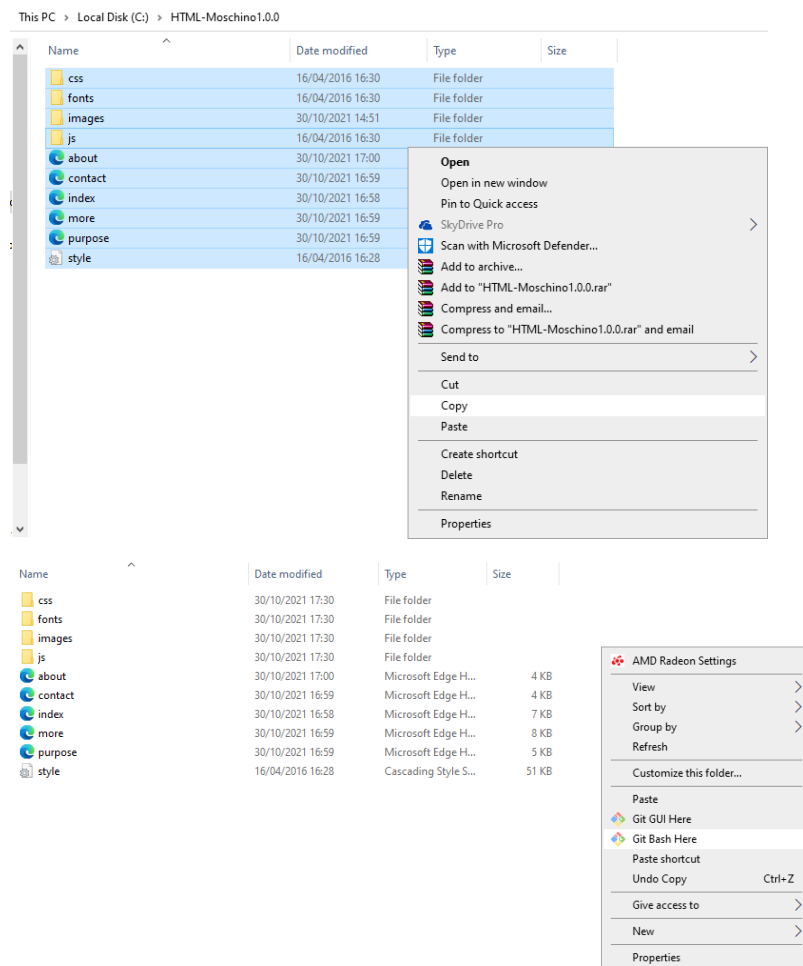

```

MINGW32:/c/UTSALPRO

USER@DESKTOP-9RQAA2I MINGW32 /c/UTSALPRO
$ git clone https://github.com/KikiTriwidiyanti/KikiTriwidiyanti.github.io.git
Cloning into 'KikiTriwidiyanti.github.io'...
warning: You appear to have cloned an empty repository.
  
```

4. Langkah 4

Mengcopy semua file template html dan juga folder yang lain pada template tersebut yang nantinya kita pastekan pada folder kosong yang telah kita buat sebelumnya, yang selanjutnya klik kanan lalu pilih git bash here pada folder repository.

5. Langkah 5

Menambahkan semua file dan directory yang akan dicommit dengan menggunakan perintah `git add .` [tanda .(titik) pada `git add .` memiliki arti semua file].

```
MINGW32:/c/UTSALPRO/KikiTriwidiyanti.github.io

USER@DESKTOP-9RQAA2I MINGW32 /c/UTSALPRO/KikiTriwidiyanti.github.io (main)
$ git add .
warning: LF will be replaced by CRLF in css/easy-responsive-shortcodes.css.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in css/font-awesome.min.css.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in fonts/behance.svg.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in fonts/fontawesome-webfont.svg.
The file will have its original line endings in your working directory

warning: LF will be replaced by CRLF in js/accordion.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/jquery.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/masonry.pkgd.min.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/plugins.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/scripts.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/tabs.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/toggle.js.
The file will have its original line endings in your working directory
```

6. Langkah 6

Melakukan first commit atau commit pertama kali yang akan kita lakukan dengan menggunakan perintah `git commit -m "first commit"`.

```
MINGW32:/c/UTSALPRO/KikiTriwidiyanti.github.io

USER@DESKTOP-9RQAA2I MINGW32 /c/UTSALPRO/KikiTriwidiyanti.github.io (main)
$ git add .
warning: LF will be replaced by CRLF in css/easy-responsive-shortcodes.css.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in css/font-awesome.min.css.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in fonts/behance.svg.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in fonts/fontawesome-webfont.svg.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in fonts/genericons-regular-webfont.svg.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/accordion.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/jquery.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/masonry.pkgd.min.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/plugins.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/scripts.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/tabs.js.
The file will have its original line endings in your working directory
warning: LF will be replaced by CRLF in js/toggle.js.
The file will have its original line endings in your working directory
```

7. Langkah 7

Pada langkah 7 ini sebenarnya opsional boleh dilakukan atau tidak karena hanya untuk memastikan saja. Disini saya memasukkan perintah git status untuk mengecek apakah semua file sudah dicommit dan juga perintah git log untuk melihat log dari beberapa commit.

```
USER@DESKTOP-9RQAA2I MINGW32 /c/UTSALPRO/KikiTriwidiyanti.github.io (main)
$ git push -u origin main
Enumerating objects: 55, done.
Counting objects: 100% (55/55), done.
Delta compression using up to 8 threads
Compressing objects: 100% (55/55), done.
Writing objects: 100% (55/55), 1.98 MiB | 212.00 KiB/s, done.
Total 55 (delta 3), reused 0 (delta 0), pack-reused 0
remote: Resolving deltas: 100% (3/3), done.
To https://github.com/KikiTriwidiyanti/KikiTriwidiyanti.github.io.git
 * [new branch]      main -> main
Branch 'main' set up to track remote branch 'main' from 'origin'.
```

8. Langkah 8

Melakukan push pada github yakni dengan menggunakan perintah git push -u origin main, untuk branchnya menyesuaikan disini saya menuliskan dengan menggunakan branch main.

```
USER@DESKTOP-9RQAA2I MINGW32 /c/UTSALPRO/KikiTriwidiyanti.github.io (main)
$ git push -u origin main
Enumerating objects: 55, done.
Counting objects: 100% (55/55), done.
Delta compression using up to 8 threads
Compressing objects: 100% (55/55), done.
Writing objects: 100% (55/55), 1.98 MiB | 212.00 KiB/s, done.
Total 55 (delta 3), reused 0 (delta 0), pack-reused 0
remote: Resolving deltas: 100% (3/3), done.
To https://github.com/KikiTriwidiyanti/KikiTriwidiyanti.github.io.git
 * [new branch]      main -> main
Branch 'main' set up to track remote branch 'main' from 'origin'.
```

9. Langkah 9

Last step, yakni kita perlu melihat dan meneliti pada github apakah langkah-langkah yang kita lakukan sudah sesuai dan benar seperti yang kita harapkan.

The screenshot shows the GitHub interface for a repository named 'kikitriwidiya01'. The top bar indicates the current branch is 'main', there is 1 branch, and 0 tags. Below this, a commit history table is displayed, showing a single commit by 'kikitriwidiya01' with the message 'first commit', commit hash 'fa704fc', and a timestamp of '4 minutes ago'. The commit is marked as '1 commit'.

File	Commit Message	Commit Hash	Timestamp
css	first commit	fa704fc	4 minutes ago
fonts	first commit	fa704fc	4 minutes ago
images	first commit	fa704fc	4 minutes ago
js	first commit	fa704fc	4 minutes ago
about.html	first commit	fa704fc	4 minutes ago
contact.html	first commit	fa704fc	4 minutes ago
index.html	first commit	fa704fc	4 minutes ago
more.html	first commit	fa704fc	4 minutes ago
purpose.html	first commit	fa704fc	4 minutes ago
style.css	first commit	fa704fc	4 minutes ago

At the bottom, there is a prompt to 'Add a README' to help people understand the project.

ABOUT ME

Hi, my name is Kiki Triwidiyanti, you can call me Kiki. Currently, I am studying as a student at the Data Science Technology study program, Faculty of Advanced and Multidisciplinary Technology at Airlangga University. I was born on June 21, 2001 in Ponorogo. Talking about family, I am an only child, sometimes on the one hand being an only child is fun but not infrequently I feel lonely and envious of friends who have brothers or sisters, but it also makes me stronger to make my parents proud, because I am their only hope. I really try to study.

• MORE ABOUT ME !!!

• MORE ABOUT ME

HELLO

Know More About Myself

HOME ABOUT PURPOSE CONTENT CONTACT

HI IT'S ME

hi you can call me Kiki, I am a cheerful child, easy to get along with and adaptable, and friendly.

PLACE

I was born and raised in the city of Ponorogo, a city famous for the art of Reog Ponorogo. The name Ponorogo itself according to history comes from the word "Pramana" which means power, secret of life, and "Raga" which means body, body. These two words can be interpreted that behind the human body is hidden a secret of life in the form of steady mental cultivation related to self-control. 4 interesting things in Ponorogo are Reog Ponorogo, Grabag Suro memorial, City of Santri, and Ponorogo chicken satay, as well as Ngebel Lake.

this plot from

STUDY

I am currently studying as a Data Science Technology student, Faculty of Advanced and Multidisciplinary Technology at Airlangga University. I entered the Data Science Technology study program through the snmptn route through the golden ticket during the AEE UNAIR event in 2020

this plot from

MINUS

while this is part of the description for some things that I don't like including that I don't like the atmosphere that is so noisy and I'm a person who can't really linger in cold weather because it will make me feel uncomfortable when cold. I don't like food that smells very strong. I really don't like seeing things that are not neat.

this plot from

PLUS

This is the description section for some of the things I like, including I like the color pink because it looks cute, beautiful, and very attractive and I also like the color black because it looks elegant and neutral. for my favorite food there are so many I like food and snacks but what I like the most are chicken steak, chicken noodles, fried potatoes, tofu rice, and rujak patis. I like nature trips the most, and go to natural tourist areas such as mountains, forests, lakes, and beaches.

ORGANIZATION

Since I was accepted at Airlangga University, I joined ORMADA UNAIR PONOROGO, an organization that serves as a forum for UNAIR student friends from the city of Ponorogo. here we can add friends and a lot of experience from several events that have been carried out.

- **PURPOSE**

HELLO

This is the page that contains the purpose of this website

UTS PROJECT

Universitas Airlangga / FTMM / Data Science Technology

HELLO, this is the page that contains the purpose of this website.

Previously, let me introduce my name, Kiki Triwidiyanti, a student with NIM 162012133003 Study Program of Data Science Technology, Faculty of Advanced and Multidisciplinary Technology, Universitas Airlangga.

It should be noted that the purpose of this website is to fulfill the assignment of the UTS Odd Semester project for the Programming Algorithm II course. This website contains biodata about myself, and also the steps for creating github pages using the git system. I am working on this website using the reference template at the following link: free-css.com

I really hope that this website is able to present well the assignment of the UTS project for the odd semester. Programming Algorithm II course is what I expected and tried. Thank you and SEE YOU.

HELLO

LANGKAH 7

```
git status
# On branch master
# Your branch is based on 'origin/master', but the upstream is gone.
#       "git branch --set-upstream=origin/master"
nothing to commit, working tree clean

git commit -m "update"
git push origin master
git checkout master
git pull origin master
git push origin master
```

Step 7 to check the status if all files have been committed by using the `git status` command and the `git log` command to view the logs of several commits.

LANGKAH 9

The screenshot shows the Windows File History settings window. The 'What to backup' section is expanded, showing a list of folders: Desktop, Documents, Downloads, Music, Pictures, Videos, and Windows. Each folder has a checkbox and a 'More options' link. The 'Where to backup' section shows a list of drives: C:, D:, E:, F:, G:, H:, I:, J:, K:, L:, M:, N:, O:, P:, Q:, R:, S:, T:, U:, V:, W, X, Y, Z, and Network locations. The 'When to backup' section shows a dropdown menu set to 'Daily' and a 'Backup schedule' section with a 'Backup time' dropdown set to '9:00 AM' and a 'Backup frequency' dropdown set to 'Daily'.

Step 9 is the last step, where we look and examine on github whether the steps we have taken are appropriate and correct as we expected.
